

# *[Spill cleaning device with built-in squeegee]*

## Abstract

A device for use when there is a spill including a spill cleaning device which can collect liquid and solid debris from a surface. The spill cleaning device includes at least one squeegee. The spill cleaning device further includes a sachet member containing a cleaner and/or a sanitizer to clean the surface after the debris is collected. The spill cleaning device is designed for simple operation and to eliminate the need for multiple items to clean a spill.
